# UWeather

www.uweather.org

This site is to provide local weather service for individuals to use on mobile devices as well as desktops.

For people who walk around the neighborhood, ride their bikes through downtown, travel to work on the city bus or train, don't want to get stuck in rush hour in the middle of a hail storm, or who just want to plan some family fun. This website will provide helpful news and weather for you in your area.

The background of the page will be white. The navigation will have a background of #42f4f4 and a selected background of #0dd9d9, and will have a font of *Lucida Handwriting* or the default san-serif. The article sections will have a background of #50c0f4 floating over an image and will have a font of Bell MT or the default serif. The weather summaries will have a background of #ff0000, and will have the font of Akko Rounded Std or the default san-serif in bold.
